## A Letter from the Principal: Mr. Zack

Every beginning has an end and every end is a new beginning.

The 2018 academic year has come to an end. Although no one can go back and make a brand new start, anyone can start from now and make a new ending.

In the last one year of our existence, we have had our fair share of challenges and successes. As a new born, the challenges were eminent but with them we have evolved ways of conquering them and forging on stronger.

Our curriculum approaches are continuously being refined and so are our assessment structures. Focus has been intensified to help the learners acquire the intended competencies, skills, positive attitude and values. Our diverse approach to learning has incorporated the Kenyan, British and International curricula and pedagogies.

As we approach the New Year 2019, we shall witness our first candidates of KCPE and hopefully the Year 6 Cambridge check point (Key Stage 2). We are fully committed to providing an effective and enabling learning environment and look forward to a successful year.

There is light at the end of the tunnel. Let us keep moving as a team, always putting the interests of our children first.

Thank you and God bless you all.

## Deputy Principal's Remarks: Ms. Valerie

I have really enjoyed this term at Mudzini. It has been such a good experience and I have learnt so much especially being in a different culture. My role is being the Deputy Principal and setting up a Music department. I also teach drama in the school.

The teaching is going really well. The pupils enjoy the lessons and like playing the instruments. The school has two choirs and we are busy rehearsing for the closing ceremony. Some of the pupils are also learning to play the recorder.

It has been a very busy term filled with many activities such as a football match against Future Hope, outing to Mamba Village and a Careers Day.

# Playgroup

At play group it has been all about: helping children feel secure and comfortable, understand the expectations of the environment and reduce the frequency of behavior problems (e.g. tantrums). We have done this by fostering social, aesthetic and motor skills in young children. We created opportunities for our young learners to develop their latent language and mathematics skills. The activities included Maths and Language Readiness, sensory Time, Story Time, Water Play, Sand Play, Creative Time, Library Time, Field Trips, Puppet shows and skits, Free Play with Technology Corner and much more. We believe that these young learners are equipped with the love of learning and curiosity which will serve as their drive as they further their schooling.

By Miss Lucy Kamau

This class is comprised of 6 children that is; 4 girls and 2 boys. They have really developed in all the areas of learning from reading, handwriting, writing, coloring and painting. These children have managed to speak some English, can express themselves and their feelings. They have grown gradually by even taking up responsibilities as peer teachers, be in charge of a learning activity to clean up and see to it that its done. My children are always willing to help each other in areas where their fellow classmate is experiencing a challenge in any area within the classroom.

They appreciate my work by saying 'Teacher you're covering our books nicely, wow!' or 'Ms. You're writing nicely.' With children when appreciated for their efforts they feel encouraged and try all they can to do their best. Most of the children can read and write three letter words, write their two names and even read simple three letter sentences. I have had a great time as their teacher and I am very proud of my children.

By Ms. Hellen Onyango

# Pre-Primary 2

Pre-primary 2 have been learning various activities in the learning areas. In mathematics learning area the pupils learnt about measurement this included measuring sides of objects using arbitrary methods learners, measuring heavy and light objects (mass), measuring capacity (how much a container holds), learners enjoyed the activities so much as they had a chance to experiment behavior of various objects when placed in water. In language activities learners put more emphasis on the writing skills learnt, they wrote their own names, three letter words and simple sentences.

In our environmental activities we learnt about weather, water, soil and safety in the environment. Learners had a chance to visit Mamba village where they had a fantastic learning experience.

In creative art activities, learners showed their creativity by making various objects using modelling techniques and paper craft. These are the examples of some of the objects made: paper fish, paper mats, flowers, basket, pots, snakes and so many more.

These learners have been practising songs and a poem for their graduation ceremony.

Ms. Susan.

It has been my pleasure and privilege to watch each of you grow and I marvel at the splendid milestones you have each made. When you all first came, you did not want to learn or participate, but look at how much learning and fun you have had! We have made many cherished moments together, some through tears and some through laughter and I know that all the things we have done have helped in some way to make you a better person. I hope you are as proud of yourselves as I am of you. With a lot of hard work and perseverance you can be and do anything! Strive to be the best that you can be.

Ms. Leah Wangari

## Children's Thoughts

Grade 1 has been awesome. We learnt a lot of wonderful things. In math, we learnt how to add, tens and ones, and counting in 5's and 10's. The topic on sources of light was very interesting. We learnt that the moon is not a source of light and how to save on light energy. We learnt a baby has 20 teeth, about sharing and loving one another. We also had fun with our friends, enjoyed playing the instruments and we loved the music and drama lessons.

# Grade 2

## What makes us unique!

In grade two we had a great time doing different activities, exchanging ideas and exploring new exercises across all subjects. We get enough time to learn at our own pace and our teacher takes care of our own needs.

By Keisha Koi.

## Special Needs: Grades 2&3

Ali Grade 3 & Mapenzi Grade 2 with their teacher; Miss Nelly

Class three is the best class ever. We would love to continue staying here but the term is short and we have to move on to the next class. Our class teacher is Miss Peninah.

In our class we have learnt how to respect and love one another and always be attentive. We learnt so many things in Maths, Literacy, ELA, PSHE, RE which some were easy and some hard. The most interesting topic was in Envi-

ronmental Activities where we learnt about how to take care of the environment.

We learnt how to reduce, reuse and recycle materials e.g plastic bottles, newspaper and tissue rolls.

We liked this topic because we are always unhappy when we see litter everywhere. (Please help us to keep the environment clean). We love class three.

Grade 3 students.

## Hopes and Dreams

When I grow up I hope to become a professor like my dad and a nurse like my mum. I wish my dreams and hopes come true  
By Rabia.

When I got to class 3 I thought it was hard, the next day I found it was very simple. I hope I will work hard and be a great Musician in the future  
By Selvia

I hope to become a teacher like Miss Leah.  
By Leah. K.

I hope to become a flying Doctor.  
By Kenneth.

My dream is to become a great footballer. I hope I get a P.S. Great footballers earn a lot. I believe I will be one  
By Emmanuel.

I Hope to be a pilot and fly aeroplanes. I love seeing them above the sky.  
By claudia

I hope to become a teacher like Madam Peninah.  
By Sharon

I hope to be a gymnast and a swimmer. I would like to be a gymnastic swimmer. I Hope my dreams come true  
By Lisa

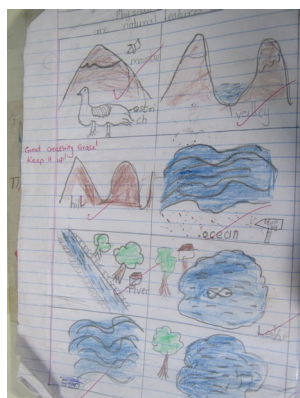

When the year began things were very tough. Most of us didn't know how to take down notes as well as writing insha and compositions. Afterwards we were able to write and everyone started enjoying life in the upper school.

The best thing about this class is the students' discipline and academic excellence in class. However we have to really try our best to maintain the same achievement. It came a time when everyone chose their favourite subjects. Every student chose the subjects they felt they are good at. No subject was left out. I asked myself why they chose those subjects but couldn't get an answer. Different lessons are taught by different teachers. Sometimes when the teacher is absent he or she gives another teacher a chance to teach that particular subject on their behalf. The teachers who teach Grade Four are Mr. Stanley, Mr. Calson, Miss Betty and Mr. Victor.

When it comes to co-curricular activities we were not left behind; Priscilla, Grace and Nasreen played football and are among the best footballers in the school. Junior, Felix and Hoffman were not left out, they represented the boys in the soccer team for various tournaments. Our class also participates in games and drama. We are also blessed to have the best dancers and swimmers in the entire school. The most memorable moment is when we payed Coastal Bottlers a visit and saw how soda is processed. We are looking forward to being the best class fives' come next year. This we shall achieve by working extra hard than we have been doing previously. Special thanks to Mr. Stanley and the other teachers for making sure that we were always disciplined and followed instructions.

Grace Kazungu  
Grade Four.

This year has been a very wonderful year. Good grades, friendship and many more. Our teacher, Mr. Victor has been teaching us Science, Mathematics and English. As students we have been enjoying learning, merits and prizes. We love our school very much may God bless our school.

## POEMS

### WATER IS LIFE

Water is life for both plant and animals  
Which plant can grow without water? No plant can  
grow without water, therefore we need to conserve  
water  
Which animal can stay without water? No animal  
can stay without water, therefore we need to conserve  
water  
Wow! Look at our environment is very clean and  
beautiful  
DO NOT MISUSE WATER, CONSERVE WATER.

### LOVE

what is love?  
Something you like.  
Like I love the brand Nike  
or I love to watch doves  
anyway love is opposite of hate  
hate is when you dislike  
dislike is when you don't like  
you cause a problem  
but you can solve them  
by the word "love"  
love, the healer  
love, the mender  
love, the friendship  
love, what we all need.

### HAPPINESS

Happiness oh happiness  
How happy I was when I passed my exam  
I can't stop smiling, the birds jumped up in the air,  
I was so happy to see it back to life. I will never stop  
being happy even if something bad has happen to  
me, because life is full of happiness.  
Have fun, this is the only golden chance to live,  
because you do not know when you will visit your  
grave.  
Have you ever think of something that made you  
happy in your life?

I love learning Mathematics, it's just a matter  
of playing with figures using four operations.  
The operations are; addition, subtraction, multi-  
plication and division. Multiplication is repeated  
addition while division is repeated subtraction.

Mathematic magic

$$9 \times 9 + 7 = 88$$

$$98 \times 9 + 6 = 888$$

$987 \times 9 + 5 = 8888$  follow the pattern and you con-  
tinue up to addition of zero.

It's a great pleasure to inform you about class five of Mudzini School. The class of 2018 has been a good one with high discipline and God fearing students. The class is comprised of hard working learners who are self driven and very much focused in their ambition. We are therefore looking forward to producing an all round citizen who will fit in the dynamic nation and even in the whole world.

Mr. Victor.

*Class motto: Everything we don't know is everything we can learn.*

*Class rule: Follow Simple Instructions (FSI)*

*Class Quote: The secret to success is hidden in books.*

## CLASS PROFILE

**Abdul Hakeem:** I love dancing and playing football. I aspire to be an International footballer.

**Riziki Mtenzi:** I am a cool girl and I aspire to be a musician.

**Annette Mumo:** Kind, social and organized girl. I aspire to be an actress.

**Sharon Kazungu:-** Medium sized girl, talks sense, loving and respectful, well organized and aspires to be an actress, news anchor and a musician.

**Isaiah Cherubim:** I am a disciplined boy who aspires to be a successful businessman.

**Cecilia Adhiambo:** I love reading books and swimming. I aspire to be a flying doctor.

**Ndela Mwiri:** I am a kind and social girl who loves reading books and aspires to be an actress and a travel blogger.

**Rehema Juma:** I'm an honest girl, disciplined and I aspire to be a doctor.

**Pam Pendo:-** simple and social. I aspire to be a pilot.

**Raul Casanova:** I am an active boy in class and I would like to be an engineer and an inventor in future.

**Alex Casanova:** I am social and I would like to be a businessman who owns a car company.

**Class teacher:** Mr. Evans.

**Most disciplined:** Rehema Juma.

**Most organized:** Annette Mumo.

**Funniest pupil:** Abdul- Hakeem.

**Smartest girl:** Pam Pendo.

**Smartest boy:** Alex Casanova.

### Class teacher's message:

I give my sincere gratitude to Administration, Mudzini staff, parents and our beloved learners for their active participation in time of need. Class six learners are so engaged in class. They really want to participate and learn more. To me as a class teacher, that speaks for itself. The object of a superior man is truth meaning that the object of a superior pupil is hidden in books. Let us join hands in encouraging our kids to read.

# Grade 7

It has been a pleasure being with grade seven students throughout the year. In this class, we believe that learning is an interactive and exciting journey full of adventure and discovery. My simple philosophy is that; when learners learn with fun and enjoyment, the concepts acquired are retained for long. Thus, we believe in value addition and treat each student as a unique creature. Our teaching staff has been committed to assist these students to achieve their level best. Class seven is a very friendly class where learners express themselves without fear and with a lot of assertiveness. Let us always remember that education is not a preparation for life; but rather education is life itself.

Quote; "The purpose of education is to replace an empty mind with an open one".

Mr. Wycliff Ombati. C/T

## NAMES OF STUDENTS

Laura George  
Ramadhan Omari  
Lovie Christine  
Ibrahim Aarif  
Sarah Kazungu

## Message from the Students

The most amazing class ever. I will start by saying our class is the best. We enjoyed a lot. Our Class teacher; Mr. Wycliff, is so nice-whenver he teaches us I promise you will always enjoy. We are so open in our class and can express ourselves in any way. We really love our class. We are taught by different teachers making it more exciting.

From Lovie Christine

The term has been well. We enjoyed learning new things which we had not been taught before. We appreciate all teachers for the good work they have done, not because they want, but because of wanting the best for their students. It has been a term of peace, joy and love. We have been truly a good family.

Sarah Kazungu.

It has been a challenging term, but we really appreciated everyone for doing their best. I enjoyed participating in all the activities and competing with other students. I am really happy that I have improved. I won't stop reading.

Ibrahim Aarif.

## Grade 7 Social Studies

Third term has been a rather short term in school. We in class 7 have really enjoyed learning a lot from our teachers.

In social studies we were able to know how to make wiki notes a model of the internet-based Wikipedia. We did wiki notes on spheres of interest for African countries by European powers. We also did look into conflict and how to resolve a conflict in the society.

Patron:- Mr. Evans  
 Chairperson: Sharon Kazungu.  
 Vice chairperson: Laura George.  
 Secretary: Christy Ngala.  
 Vice Secretary: Jessica John.  
 Coordinator: Ibrahim Aarif.

Every pupil in Mudzini School belongs to this club. It has been one of the best after school activities. It is stunning, educative and motivating. We have had several motions to debate on this year. The most thrilling one was "Rules and regulations should be abandoned on a model grand debate presided over by non-other than Mr. Craig.

There have been great improvements on how we conduct our debates. Fellow pupils have learnt to accept responsibilities. Debates help us think and come up with accurate solutions. We are looking forward to doing more next year.

By Sharon Kazungu.

### PATRON'S REMARKS

Infuse your life with an action. Don't wait for it to happen. Make it happen. Make your own future, make your own hope. Make your beliefs through debate. Debate, not once, not twice. Debate on your own and with others on issues, opinion, suggestions and or facts.

We have had lovely moments debating. I thank everyone who sacrificed his/her time, energy and resources to make the debate sessions great.

Debaters keep the flame burning since we are

looking forward to invite other schools for competitions next year.

By Mr. Evans Odhiambo.

## Journalism Club

Patrons: Mr. Victor, Mr. Evans and Mr. Calson  
 Chairperson: Lovie Christine.  
 Vice chairperson: Christy Ngala.  
 Secretary: Sharon Kazungu.  
 Treasurer: Pam Pendo.  
 Coordinator: Laura George.  
 Assistant coordinator: Ndela Mwiri

We feel proud of ourselves being journalists at Mudzini School. This is the best club in the school since we are always informed, bonded, confident, humble and ready to serve others. We are working on time management and planning. Visit us on M.S. B. C.

By Lovie Christine. ( Chairperson)

## Dance Club

We love and enjoy dancing where we get to showcase our different moves in dance and we gain confidence as we perform each time. We as Ms Dancers believe that hardship and practice often prepares us for an extraordinary destiny. Ms. Faith.

The department comprises of the following subjects; English and Kiswahili. First I would like to thank God for how far He has brought us as a department, secondly give a big thank you to the management, administration and all the other stakeholders for providing all the necessary resources which made our work easier.

Our learners have shown fair improvement in terms of reading, speaking and writing in both languages due to strategies put in place which include language policy, analysis of the exams done, regular debates and 'mjadala' and different teaching approaches like peer teaching, team teaching, differentiated learning, remedial, newspaper reading among others. We are committed as a team to do more come next year.

I wish to thank the team behind the success of this department for their sacrifice, co-operation and commitment. They include:-

Mr. Evans Odhiambo	H.O.D
Miss Leah Wangari	H.O.S (English)
Mr. Hanzuwan Abubakar	H.O.S (Kiswahili)
Mr. Victor Otieno.	Member
Mr. Calson Mukhongo.	Member
Mr. Stanely Lenjo	Member
Miss. Susan Ngolanye	Member

Evans Odhiambo.

## Physical Health Education Department

It's been an eventful year here at Mudzini, with lots of sporting events, competitions and activities happening throughout. This year, we have been lucky enough to participate in the Mombasa international schools tournaments. The under thirteen year's boys football team enjoyed a very tough match against light academy malindi in May, losing in penalties. They put into practice all the skills they've been learning in their P.E lessons and were led well by their captain Alex Casanova.

Our under nine year's girls football team led by their captain Sharon Mganga performed brilliantly at the Aga Khan Academy football tournament in June. They put all the new skills into action and demonstrated excellent sportsmanship, teamwork and respect during the matches.

The under thirteen year's girls netball team led by their captain Laura George attended their first tournament at light academy Mombasa where they competed against six other teams. Not forgetting the under eleven boys and girls football team led by Nelson Wanje and Priscilla Kazungu which did an exemplary job during the tournament at Aga Khan Academy.

More exciting, our early years students, participated in the inter nursery athletics at Oshwal academy Mombasa which gave them an opportunity to compete in a range of athletic events. They participated in ball throwing, running and cycling.

To round off an excellent year in sport, the under thirteen year's girls and boys team participated in a tough friendly match at Future Hope academy at Vipingo.

Overall, the students did a very impressive job and this high performance reflects the enthusiasm our students have for their P.E lessons. Well done everyone!

# Information Communication & Technology

It's been an exciting year in the ICT Lab for early years and primary school learners. The children were empowered with skills and knowledge in game creation using Scratch program. Class 6 and 7 participated in an hour of code where they were awarded with certificates. Subject integration has also been a key focus during the lessons. The activities the learners engaged in were level based and students were able to engage in age appropriate technology activities. As a teacher I design interesting lessons and ensure that all children receive their entitlement. Learners pick up the skills quickly, and get very enthusiastic. Looking forward to another productive year.

Ms. Serah Wachira

## VIRUSES AND MALWARE

Viruses and malware are programs that can attack computers, tablets, phones and other digital devices.

A virus is a small program designed to cause trouble by gaining access to your device. It can copy your personal data or slow your device down. A virus spreads by duplicating and attaching itself to other files.

*What can happen to your device?*

By combining the words 'malicious' (meaning 'harmful') and 'software' we get the word 'malware'. Viruses are just one type of malware. Other types include spyware, worms and Trojans.

Malware is made to stop your device from running properly and sometimes to steal your information. Your device can be harmed very quickly if it is infected by malware. It could crash, reboot or slow down.

Your internet connection may also slow down as the virus or worm searches for other devices to infect, or transmits your data back to its maker.

### Common types of malware

#### Viruses

A virus is a type of malware that spreads through normal programs. Once your device has a virus it may spread easily and quickly. A virus might just slow down your device - or it might be so severe you lose all your applications and documents!

#### Worms

Worms can spread from device to device, but unlike a virus they don't need to attach themselves to other programs. Worms can copy themselves hundreds of times, so they can very quickly harm your device and other devices. A worm might copy itself onto your email account and then send a copy to all of your email contacts!

A Trojan horse (or just a Trojan) **pretends** it will be a useful and safe program, when actually it will try to attack your device.

James Junior Grade 4, Mudzini school

## MY ICT LESSONS THIS YEAR

*My term kicked off on a very high note. All the Information Communication and Technology (ICT) lessons have been amazing, challenging and enjoyable at the same time.*

*I have particularly learnt a lot of ICT applications. These are; programming in scratch, making presentations using PowerPoints (this includes making slides of different topics), Microsoft word and Excel. We also learnt how to sign into google classroom and how to send emails.*

*In Microsoft word we made biographies on famous people, our teachers and last but not least an autobiography about ourselves. On the other hand, in scratch, we made different games and animation. In Excel we used formulae to do calculations and insert graphs.*

*I'm looking forward to next term, I hope the term will be much more fun and enjoyable. Thanks to my teacher Ms. Serah I have enjoyed these years' ICT lessons.*

*Laura George.*

*Class seven, Mudzini School.*

### WOW!!!! ICT LESSONS HOW AMAZING IT IS TO LEARN MY FAVOURITE

I'll start by saying ICT is a very wonderful lesson to learn. In ICT we learnt different things like Microsoft Word, PowerPoint, Scratch, and Microsoft excel. Our ICT teacher is called Miss Serah. She is a very wonderful teacher I promise you when you are taught by Miss Serah you will really enjoy the lessons.

I want to take this time to tell you more about ICT. I'll start by saying ICT stands for Information Communication Technology. Okay now I will take you through scratch 2.0 and what I have learnt about it. I'll start by saying scratch is the most exciting lessons I have learnt. It's more of giving commands to a computer, a person or a text. When you give it commands it will just do whatever you tell it to do. We have created stories and games using Scratch program.

PowerPoint is another interesting package to learn. In PowerPoint we learnt how to research, copy and paste information in power point from the internet. It is so easy when you understand how to do it. You just go to the internet and highlight what you want, right click on your mouse and copy then click on your PowerPoint and paste.

In Ms. Word we learnt how to type autobiographies and biographies. Autobiography is where by you write about your life while biography you write about someone else's life. For biographies, we had a chance to go to the offices and interview some of the Mudzini staff. It was an awesome experience. We then typed and learnt how to format text, insert borders and pictures.

Ms. Excel is where we did calculations using formulae, we did additions, subtractions, multiplications and division. We learnt how to enter a budget and calculate the totals. We also had a chance to insert a graph.

Google classroom is where teachers post what they want us to research on. We type in our password and do the work then send to the teacher using our emails.

It's been a lovely term. Full of activities and learning. Looking forward to next term.

Lovie Christine,  
Class 7  
Mudzini School

# Writing & Creative Art Section

## WHERE DO I FIND A GOOD LIFE?

I am living now even before I was living  
I was living in a dark room  
The different of the day and night was the same  
I could not see where I was, but not that I was blind  
Where was I?

My life was very comfortable but with a lot of stress  
Yes I was not struggling to earn a living  
I could eat and drink any time I want  
But I could not make any decision neither question  
I could not eat the food my heart desired  
Where was I?

I was denied all the rights  
I couldn't move yet I was not cripple  
I could not talk yet I was not damp  
But I was comfortable though I was a prisoner  
Where was I?

All the decision I was made for  
Both the right ones and the wrong ones  
But I could not talk to defend myself  
I was done for everything including  
Things which I did not want in my life  
Where was I?

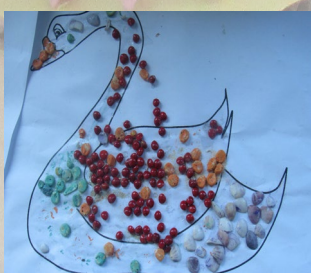

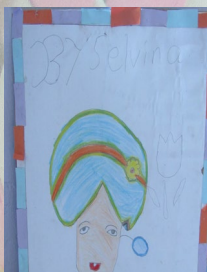

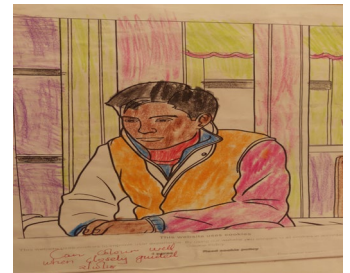

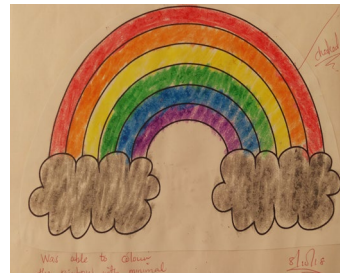

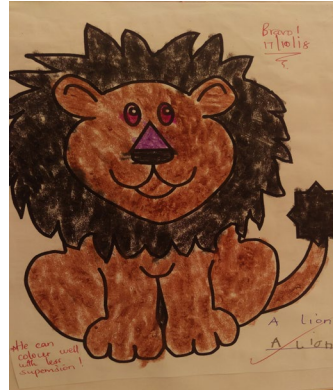

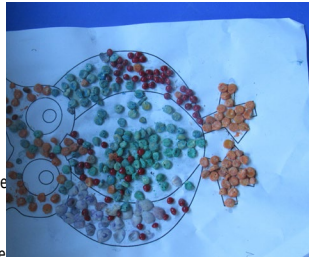

Now I am living again but a very different life  
I have been given all the rights, which I was denied before  
But what can I do with it?  
Nothing! Nothing completely!  
I wish to go back to my past life but all is like a night mare  
Where was I?

Now I have all the freedom that I was denied before  
But do they have meaning to me? No! No! No!  
I have a freedom of expression, but who will listen to me?  
I have freedom of association but who do I associate with?  
The food I desire are all here in the earth, but still I can't eat them  
Where was I?

*By Grade 5 class (Jessica, Christy, Onesmus, Florence & Agnes)*

*Edited & typed by Mr. Victor*

I am struggling to make the ends meet  
But do they meet?  
I do everything I can in my life  
But who is there to appreciate me?  
I want to live at the center of the earth  
I may find the better life there  
Tell me where is the center of the earth?

## Career Day at Mudzini School

We had our termly Career Day on Saturday the 22<sup>nd</sup> of September 2018 from 9am to 12.30pm at the school auditorium. The event was graced by 3 different professionals from diverse backgrounds.

Keith Barclette (Entrepreneur & Mechanic Engineer)

Anne Hemberger (Chief Executive Director at Raia TV)

Arif Ibrahim (Lamu County Government)

In line with our founding principles to equip learners with practical life skills, we aimed to start grooming our learners to be able to make informed career choices regardless of their preferences, backgrounds and ambitions.

Our Director, Mr. Antony, also took this opportunity to encourage our children to be all they can be, find themselves and keep working hard in all that they do.

The highlight of the day was Keith's 11-year-old son, who spoke to our learners from a peer to peer perspective.

The event was also graced by some of our parents.

## Ingo & Sonja's 10<sup>th</sup> Wedding Anniversary

On Thursday, the 11<sup>th</sup> of October 2018, we hosted the 10<sup>th</sup> Anniversary for Sonja and Ingo, who have been part of the larger Mudzini Family for over 20 years.

The event was attended by over 350 guests from round the globe.

Performances from the Mombasa Roots band along with a host of other traditional and cultural entertainers kept guests on their feet.

Sonja and Ingo renewed their vows, presided by Allan and Esther, our Board Member and Chairlady.

Several existing and potential parents joined us for the celebration that lasted into the night. It was truly a memorable occasion.

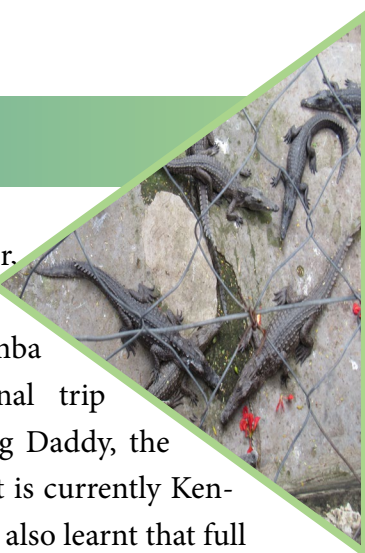

## Early Years Trip to Mamba Village

On the 5<sup>th</sup> of October, 22 of our Pre-Primary students went to Mamba Village. This educational trip saw the students see Big Daddy, the 100+ year crocodile that is currently Kenya's largest. The students also learnt that full grown crocodiles are fed around 17 to 20kgs of meat once a week while the younger ones are fed 5 to 10kgs twice a week.

The day's events could not be concluded without a visit to the mamba village fun park for merry go round rides and the bouncing castle.

The children returned to school at around 14:30.

## MS Friendly Football Match vs Future Hope

Our U13 girls and boys teams participated in a tough friendly football match against Future Hope Academy in Vipingo. Despite losing both matches, the students displayed great sportsmanship, teamwork and respect during the matches. Abdul and Ibrahim combined well to produce the only goal of the match for the boys while Pam and Laura stood out in the girl's match.

The students were impressive which was reflective of all the enthusiasm during weekly training sessions.

## Our First Ever Swimming Gala

On Saturday the 3<sup>rd</sup> of November 2018, we held our first ever Swimming Gala that run through Pre-Primary to Grade 7.

This was a first experience for many of the students, especially those in middle school and Pre-Primary. The Swimmers rose to the challenge with cheerful determination, the older swimmers supporting the younger ones, family and friends cheering.

Experience was gained by all swimmers, each learning their own strengths and weaknesses. The Sharks and Dolphins tied at 92points for the lead while the Whales followed with 91 points ahead of team Starfish with 88points.

Our journalism club was the official interviewer with the staff race, won by our Principal Mr. Kabiru creating excitement amongst the students.

Early Years beachball race with their team captains

This is going to be a termly event moving forward.

Well done to all the teams!

Journalism Club interviews Mr. Zack

Upper Primary students compete

## PP2 Graduating Class of 2018

*Congratulations to the PP2 graduating class of 2018*

# School Operations & Closing Remarks

It is all thanks to God for thus far He has brought us. Mudzini School is now one year old and we have seen progressive growth in our student numbers as well as our operations. Next year promises even better prospects. We recognize that Primary Education forms the initial stage of education whose aim is to create, nurture, establish and give opportunities to all children, regardless of their age, gender, physical and cognitive abilities. Mudzini School has positioned itself as a preferred school of choice by students and parents alike, by offering quality holistic education which offers broad-based opportunities for students' cognitive, social, emotional, cultural and physical skills, setting a firm foundation for their further schooling.

We have now fully equipped our play areas (outdoor) with a trampoline, bouncing castle, merry go round, slides, swings, and a chuchu train and (indoor) with a learning playhouse furnished with concepts borrowed from Montessori, Froebel and Reggio Emilio Early Years approaches to enrich our young learners' learning experiences as well as nurture their creativity by exploration and experimentation.

## Collaborations & Partnerships

This term saw the introduction of Music and Drama lessons by Ms. Valerie, our Deputy Principal. To expose the talent that is within us, we have formed strategic partnerships with **Raia TV** and **Jiffy Pictures Limited**, a film production Company whose productions include **MAZA & AZIZA** aired in DSTV Maisha Magic East Channel 158 and Citizen TV. We continue to celebrate our students who have succeeded in the area of performing arts.

In ICT, we have joined a Code Club program which is facilitated by British Council in collaboration with Raspberry Pi Foundation for our 9-13 years. This will help nature more emerging talents and encourage their creativity and innovation in ICT at a world stage. Our students are up to the challenge as their ICT knowledge base is quite secure.

To support our school culture of safety and joy, we have partnered with **Red Cross** and **E Plus** Emergency Medical Services for emergency response in case of injury at school, on the way to and from school, and during field trips and events.

## Conference Facilities

Our state of art conference facilities and our outdoor play areas are available to the public at a small charge. Our fun-filled holiday clubs/camps will still run this holiday. Please contact or visit us for more information.

## Geographical coverage

We now have our footprints in Nyali, Bamburi, Shanzu Mtwapa ,Kikambala Vipingo, Shariani, Takaungu, Mavueni, and Kilfi. For this, we are grateful to all our parents for their enthusiasm and the amount of trust they have put in us. For all our new and prospective parents, welcome to the MS Family.

*Bernice Nduva, Curriculum & Administration.*

*MERRY CHRISTMAS!  
&  
A PROSPEROUS 2019*

*from all of us at Mudzini School*
